

Module: 2 HTML and CSS

8. In how many ways can a CSS be integrated as a web page.

CSS can be integrated into a webpage in Three ways:

1. Inline CSS:

It accesses by using <style> Attribute inside HTML elements.

In single Line we can apply a unique style to a single HTML element.

Example: <h1 style=" color: blue; font -family: arial; background-color: red;">Vishwa</h1>

2. Internal CSS

An Internal CSS is defined in the <head> section of an HTML page, Within a <style> element.

Defines a style for a single HTML page.

Example:<head>

<style>

P {

Color: red;

}

</style>

</head>

<body>

<p>My Name Is Vishwa</p>

</body>

3. External CSS:

Defines the style for many HTML pages.

To use an external style sheet, you need to add a link to it in the <head> section of each HTML page.

Must be saved with a .CSS extensions.

Example:

```
<link rel="stylesheet" href=" (.CSS file)"></link>.
```
